How to Manage Third-Party Cyber Risk

Free CyberWeek Kick-Starter

Does your organization rely on partnerships with suppliers or vendors? If so, are you able to determine if their safeguards and security policies are sufficient to prevent a data breach that harms your enterprise?

Cybersecurity consulting firm **TSC Advantage** invites you to learn about **third-party cyber risk management** to kick off **DC CyberWeek** at our upcoming breakfast and brainstorming seminar. Reserve your seat for October 16 in Silver Spring, MD - a short walk from the Metro - now.

- Hear how hackers have used third parties to steal information and interrupt business
- Learn how to make cybersecurity part of your enterprise risk management process
- Get a four-step plan to begin third-party cyber risk assessment
- Enter to win a free staff or board training on cyber threats

To secure your enterprise in today's outsourced business environment, conduct business with the federal government, or meet regulatory requirements, you must understand and protect your entire digital ecosystem. Even though your data may be stored within a third-party's environment, YOU are ultimately responsible for its security.

REGISTER by replying to this email and include the names of colleagues interested in attending as well.
